Lip Treatment
\$19.00

Puckered-up?

Become Beauty's nourishing and stimulating Lip Treatment aids in reducing the appearance of fine lines and wrinkles around the mouth.

REVIEW: This is a wonderful line from Australia and their lip treatment is of no exception! Many a time when you're looking for a product that'll help soften up those lines around the lips, you find yourself craving moisture at the same time. This treatment does both. Reduces lines by about 37% with twice daily usage (results are typically seen in about 3 weeks). And I love how well it moisturizes thanks to jojoba oil. Not too slick that it's off with the first sip of a drink either. Its' applicator makes the product glide easily onto the lips and just a tiny amount is needed for ample coverage. No stickiness at all and I've definitely seen results from it. Not to mention NO cracked lips during below freezing temps for the past 3 weeks.
